

# National Technology Transfer Center (TTC) Evaluation Plan

Design

Assess

Examine

Evaluate

Provide Recommendations

## Design a comprehensive evaluation plan for all TTCs

1

- Identify and document dissemination and TT process
- Assess the strength of EBPs disseminated
- Compare identified needs with objectives of dissemination plan
- Assess appropriateness of communication strategies to disseminate EBPs to agencies
- Assess inter-network coordination among TT regions

## Assess the degree to which TTCs are reaching agencies throughout their network

2

- Identify number and proportion of agencies that received TTC training / services
- Use GIS mapping to assess the distribution of TTC training / services received

## Examine the quality of the services through assessing fidelity and agency satisfaction

3

- Assess the degree to which TTC trainings / services were delivered with fidelity
- Review GPRA data to assess agency / recipient satisfaction

## Evaluate the likelihood of EBP adoption / implementation

4

- Review GPRA data to assess intent to change practices
- Assess changes in agencies' practices after receiving the TTC trainings / services
- Compare the assessed quality of the TTC trainings / services with changes in practices

## Provide recommendations for increasing the effectiveness of TT

5

- Identify and assess gaps in the TTC model and make recommendations on bridging these gaps
- Identify possible barriers to achieving effective dissemination of EBPs throughout the TTC model
