

P.I.G.'s De-Veil eB(b) Tool

As an organization of service, we want a playbook full of possibilities. Therefore, we need fit–creative and innovative thinking to call the best plays (ideas) to sustain success in our ecosystem. Because of this, we have mixed Creative Problem Solving, innovative thinking and Applied Imagination into a mental workout that shifts paradigms and leaves participants free to navigate success strategies they are charged to create.

Together, we will capture beliefs, ideologies, customs, rites, religions, cultures, or rules that you have or currently subscribe to. We will then, trace the recorded conviction throughout your personal timeline to discover it's origin. And then, explore if the belief serves you or hinders our individual growth and progression. Keep in mind our framework, “imagination breeds creativity. Creativity produces options. In those options we find freedom.” Thank you and have fun!
