

GPR data for annual and semi-annual reports guide and information

- 1) The main target reports in SPARS -- "Event and Participant Coverage" and "Follow Up Rate" -- are only counting old TTC forms towards the targets. They do not include any new TTA forms, so that is making coverage rates look lower than they should be.

TTA Coverage

[See Filter Details](#)

Grant Performance Period: 9/30/2017 - 9/30/2023

Grantee Information	Event Target	Events Completed	Event Coverage Rate	Participant Target	Post Event Forms Completed	Participant Coverage Rate	Actual Participant Attendance ¹
University of Missouri Kansas City, ATTC, MO TI080205	2022:	12	8	66.7%	222	83	37.4%
	2023:	0	0	N/A	0	0	N/A
	Cumulative	64	61	95.3%	1,212	1,874	154.6%
Total	2022:	12	8	66.7%	222	83	37.4%
	2023:	0	0	N/A	0	0	N/A
	Cumulative	64	61	95.3%	1,212	1,874	154.6%

SAMHSA Target Coverage

Fiscal Year:

Event Target (from SPARS): 12

Participant Target (from SPARS): 222

Event Target to Date (prorated by month since 10/1/2021)	# of Events Completed (# of EDFs)	% Event Coverage	Participant Target to Date (prorated by month since 10/1/2021)	# Post-Event Responses Sent to SPARS	% Participant Coverage	Actual # Participants (from EDFs)	# Follow-Ups Due (25% of Consents from EDFs)	# Follow-Up Responses Sent to SPARS	% Follow-Up Coverage
12	10	83.3%	222	98	44.1%	299	11	9	81.8%

NOTE: These numbers only count EDFs entered into the GPR Upload system and survey responses collected with GPR online surveys. They do not reflect any EDFs or survey responses entered directly into SPARS, or survey responses in this system that have not yet been sent to SPARS.

Note the discrepancy between the numbers from SPARS and Lanitek.

- 2) The SPARS Frequency Distribution reports have been recently updated to include both TTC and TTA data. To use the SPARS Frequency Distribution report go to: TTA Programs > Reports > TTA Programs, then click on "Data Visualizations". From there, select TTA in the top menu, then "Frequency".
- 3) Lanitek "Frequency Distribution" reports do work for TTA forms, but they need to be run separately for TTC forms versus TTA forms. That report breaks down the percentages for each question and answer, and the two form types have different questions and answers.

Frequency Distribution Report

Note: Any survey responses manually entered directly into SPARS will not be counted in this report.

Survey Type:

Include Event Dates After (MM/DD/YYYY):

Include Event Dates Before (MM/DD/YYYY):

Only Event Codes that Match or Include one of the following: (optional)
 (optional)
 (optional)

Recommendations

- If you want to include GPR Frequency Distribution data in your annual report, you can either use the SPARS Frequency Distribution for combined TTC and TTA data, or you can pull it from Lanitek's Frequency Distribution reports which will report them separately.
- If you want to include FY22 target coverage data in your report, you can provide the Coverage and Follow Up rate numbers shown in SPARS along with a disclaimer that "TTA form counts are not included in the SPARS coverage numbers", **and/or** you could include the FY22 coverage and follow-up rate numbers shown in Lanitek reports which do combine both TTC and TTA forms.
