

Do you use (or have used) PrEP? Are you over age 18?

The University of Missouri and University Health are conducting a research study and looking for participants who are willing to:

Share their perspectives on PrEP through discussions and images (interviews are one-on-one, private, and via zoom or phone calls)

Inform marketing materials to encourage others to use PrEP

Participants will receive \$100 for taking part in two project interviews.

If interested, contact Dr. Michelle Teti at tetim@health.missouri.edu to sign up for the project and get more information, or notify a PrEP or Peer Educator.
