

Prevention and Rescue of Fentanyl Overdose Using Optimized Naloxone Distribution Strategies (PROFOUND) Project Forum

Thursday, January 27, 2022
12:00–1:30 PM (ET)

12:00 – 12:30 PM **PROFOUND Project Overview**

12:30 – 1:15 PM **Breakout Sessions**

Overdose Prevention moderated by Brandon Marshall, PhD

This breakout session will provide attendees with an opportunity to provide feedback on adapting our naloxone and resource allocation tool to your jurisdiction, scenarios to optimize naloxone distribution to particular types of organizations, and features that will be most important to you.

Model Development moderated by Xiao Zang, PhD

Obtaining your feedback on the implementation of our micro-simulation and decision tree model, user interfaces and dashboards, and creating publicly accessible repositories for the storage and dissemination of model code.

National Perspectives moderated by Czarina Behrends, PhD, MPH

Gaining your perspective on national naloxone distribution strategies and contexts that differ among regions and states, adapting our tool to meet local needs and capabilities, and taking into account data limitations or differences.

1:20 – 1:30 PM **Regroup and Close**

This five year study is a collaboration between three main teams of expert researchers, epidemiologists, biostatisticians, and doctors located in New York City, Rhode Island, and Massachusetts and the National Institute on Drug Abuse (NIDA). Teams are comprised of experts from Weill Cornell Medicine, the New York City Department of Health and Mental Hygiene, Boston Medical Center, Boston University School of Medicine, and Brown University. PROFOUND is funded by the National Institute on Drug Abuse (NIDA) U01DA047408.
